# UTAH IN REVIEW-1985

Utah's economy remained reasonably strong during 1985, despite the closure of Kennecott Copper operations early in the year. While there was a slowdown in the rate of growth, the recession in the mining industry was largely offset by gains in other areas of the economy. Between December, 1984, and December, 1985, total nonagricultural employment in Utah rose by approximately 17,600, while unemployment in the state declined by 1,000.

Despite the reasonably good economic picture in 1985, there were signs of a slowdown in the latter part of the year. Revenue collections during the early part of the 1985-86 fiscal year were below expectations, and analysts were predicting a revenue shortfall of $25 million for the year.

Even more serious is the state financial outlook for the immediate future. If the revenue and expenditure trends of the past five years continue, Utah could experience a combined revenue shortfall of $1.7 billion between 1986 and 1991 from present revenue sources. Even if this historic growth rate is reduced by 50%, existing revenues would fall $820 million short in meeting expenditure needs during the 1986 to 1991 period.

Although Utah has some serious financial problems facing it in the period immediately ahead, there also were some causes for optimism:

1. A substantial part of the $96 million appropriated by the 1985 Legislature to cope with flooding problems around the Great Salt Lake remains unspent. If nature continues to cooperate and no additional flooding occurs in 1986, up to $56 million of the original flooding appropriation may be available to meet other state problems.

2. Inflation has continued to remain at a relatively low level during the past three or four years. It should be noted, however, that while this tends to reduce the rate of increase in state expenditures, it also will hold down future revenue growth.

3. There are signs that school enrollment growth in Utah is beginning to slow down. The birth rate in Utah now is declining, and the state has been experiencing some outmigration of population. Although school enrollments in Utah will continue to rise, the year-to-year increases in the future should be less than what they have been in the immediate past. A substantial part of the increased spending in Utah during recent years has been devoted to accommodating the enlarged school population.

4. The State has recognized the serious financial problems that it faces, and has taken some corrective actions. The 1986 Utah Legislature, for example, ordered immediate expenditure cuts to meet the $25 million budget shortfall for 1985-86. Moreover, the state budget approved for the 1986-1987 fiscal year is considerably more conservative than those enacted in the recent past.

An analysis of consolidated state finances for 1984-85 shows that general revenue in Utah totaled $2,320,577,000, while state expenditures amounted to $2,238,132,000. This was the second consecutive year that state revenues exceeded state expenditures in Utah. A substantial part of the apparent "surplus" during the past two years is accounted for by a build-up in unemployment benefit reserves. In 1982-83, Utah depleted all of its unemployment reserves and was forced to borrow from the federal government in order to continue unemployment benefit payments.

Sales taxes and income taxes account for more than 70% of all state taxes and nearly half of all state revenue receipts in Utah. Last year, the general sales tax produced $555 million in state revenue plus an additional $135 million in local revenues, while state income tax receipts (both individual and corporate) exceeded $500 million. The other major tax - the property tax - produced $660 million in 1985. All of the property tax revenue, however, is used to support local units of government (counties, school districts, municipalities, and special districts).

More than 80% of all state spending in Utah is for education, social services, and transportation. Education, of course, continues to be the number one area of state expenditures, with 1984-85 costs exceeding $886 million. Not included in this total are education expenditures from locally-raised revenues, expenditures for capital outlay at the state educational institutions, and spending from restricted funds at the Utah colleges and universities.

Social services (health, welfare, corrections, mental health, family services, unemployment benefits, etc.) is another spending area that has been growing very rapidly in recent years. Last year, expenditures for these items totaled $584 million, an increase of nearly $91 million or 18.4% from the previous year.

Utah has one of the lowest per capita income levels in the nation. During 1984, Utah's per capita income of $9,733 was nearly 24% below the U.S. average. Because of Utah's large families and the high percentage of its population in the nonworking age group, however, per capita income tends to produce a misleading picture of the state. Personal income per adult (age 21 and over) is approximately 8.5% below the U.S. average, and the average annual wage in Utah is only about 7.3% below the national average.

* Excludes expenditures for administration and for social services.

** Beginning in January, 1974, money payments for old-age assistance, aid to the blind, and aid to the disabled were paid directly by the Federal Social Security Office.

# Prior to fiscal 1962, medical assistance expenditures are not shown separately. Such medical expenditures are included in program expenditures for these earlier years.

Prepared by UTAH FOUNDATION from reports of the Utah Department of Social Services and Utah Department of Health.

NOTE: Assessment levels for 1985 in above table are based on 80% of the current value as indicated by comparable sales or cost appraisal of properties. This 20% discount represents an estimate of the fees, closing costs, and other expenses that would reduce the actual money value to the seller. For practical purposes, therefore, the actual legal rate of assessment in 1985 is 12% (80% of 15%) for primary residential property and 16% (80% of 20%) for other local property classes (industrial, commercial, vacant, and secondary residential). Assessment levels for the different property classes in the various counties should also be reduced by 20% to arrive at the average assessment-sales ratio.

* Assessment levels shown are for the previous year as no new ratios were published for the indicated counties.

Prepared by UTAH FOUNDATION from Assessment-Sales Ratio studies compiled by the Utah State Tax Commission for the various years.

* Because of the overlapping boundaries of the various special districts in the state, more than one levy may apply within a municipality or school district. For example, 24 different overall mill levies are applied within Ogden City and 15 different levies are found in Salt Lake City. Actually, there are 152 different taxing areas in Salt Lake County, 198 in Weber County, and 68 in Davis County. In the preceding county tabulations, the different taxing areas are designated by one or more code letters following the name of the municipality or school district. Each code letter refers to some special taxing district which imposes or is authorized to impose a levy within the district. Thus, "Weber Schools - A,B,D,J,K,ee" refers to the taxing area in the Weber School District (outside of any incorporated city or town) which is in the Weber Basin Water District (A), Central Weber Sewer District (B), Ben Lomond Cemetery District (D), the Bona Vista Water District (J), the Weber County Mosquito District (K), and Weber County Fire Protection District #4 (ee). Of course, in addition to these taxing district's levies, the countywide levies for schools and county purposes are applied in the described taxing area.

a/ Due to inadequate local reporting no breakdown of assessed value within area is available.
